Middle East's Resilient Growth

The Middle East countries is forecast to register improved growth in 2024, due to broadly stabilizing oil production following output cuts in 2023, moderation of inflation, supportive fiscal policies, and momentum in the non-oil economy.

The outlook for the GCC region in 2024 is more optimistic in comparison to the rest of the world. The GCC economies will grow at a faster pace in 2024, averaging 3.5% this year, much faster than 0.8% in 2023.

The 2023 awards value in the Middle East and North Africa region surged well beyond the average value of annual awards in the past five years to reach \$254 billion. The heightened activity was driven by extraordinary levels of contract awards in both the Saudi Arabian and UAE projects markets, which saw \$95bn and \$79.5bn in awards, respectively, across all sectors. All the GCC countries witnessed at least double-digit y-o-y growth in their aggregate value of contracts awarded during the year.

The GCC market has a strong pipeline of upcoming regional projects valued at \$270bn.

Top scheme to watch in Saudi Arabia includes \$1.25 trillion gigaprojects. Other big projects include the development of the Jafurah onshore unconventional gas field and expanding Aramco's Master Gas System, the estimated \$7bn plus Zuluf upstream scheme, and the Manifa offshore oil and gas field.

Aramco, the national oil company of Saudi Arabia, has a significant pipeline of planned projects, including petrochemicals projects estimated to be worth up to \$200bn. Aramco, and its petrochemicals producing subsidiary Saudi Basic Industries Corporation (Sabic), plan to establish 10-11 large mixed-feed crackers by 2030, as part of the global liquids-to-chemicals programme, which is projected to see investments of up to \$100bn and aims to convert 4 million bpd of oil production into high-value petrochemicals and chemical feedstocks.

With more than \$545bn worth of projects planned or underway, the UAE is the second largest projects market in the region after Saudi Arabia. Abu Dhabi National Oil Company (Adnoc) will be a key project sponsor with a 2021–25 capex budget of \$122bn. Top projects include the \$7bn expansion project at Abu Dhabi's Upper Zakum offshore oil field and the \$4.5bn Ruwais LNG Terminal project.

Qatar's spending is focussed on oil, gas and utilities schemes. The main upcoming projects are Qapco's \$1.5bn PDH / PP Plant and Kahramaa's \$3bn Facility E IWPP.

The oil and gas producers in the region are investing heavily in building upstream and downstream production potential. Saudi Arabia and Kuwait target first gas from the \$5bn offshore Dorra gas field by 2029. Iraq Oil Ministry's \$3bn Artawi oil field development to ramp up production 210,000 bpd within four years. Iraq's National Investment Commission (NIC) announced three investment opportunities in the oil refining sector worth nearly \$25bn.

The power generation projects remain among the highest priorities in the region and will continue to see large-scale investments in the years ahead.

Saudi Arabia has \$45bn worth of power generation projects in the pre-execution phase, in addition to the 17.6 gigawatts of nuclear capacity with a total value of \$40bn. Kuwait relaunches tenders for Az-Zour North IWPP and Al-Khairan IWPP. The projects, due to be completed in 2027, will have a combined production capacity of 4.5 GW and 153 MIGD. The projects' estimated cost is \$6bn.

The region is showing strong commitment in clean energy projects including sources like solar and low-environmental-impact hydrocarbon. According to Strategy&, part of the PwC network, the Middle East has the potential to witness an economic growth valued at \$3 trillion. Saudi Arabia is making progress on the development of the \$8.4bn green hydrogen plant in NEOM. Oman aims to produce up to 8.5 million tons of renewable hydrogen a year by 2050 with around \$140bn in investment.

The momentum in the region's projects market is expected to continue this year with abundant new opportunities to bid in.

TEI Editorial

Projects

Adnoc/Taqa's Nouf Water Treatment and Transportation Project (WTTP)

CLIENT: Abu Dhabi National Oil Company (Adnoc), UAE
STATUS: Contract awarded

Abu Dhabi National Oil Company (Adnoc) has awarded a contract worth \$136.78mn to National Marine Dredging Company (NMDC) for the construction of Al-Nouf artificial island.

The contract could be linked to the Al-Nouf seawater treatment plant and water collection and distribution network project, for which Adnoc and Abu Dhabi National Energy Company (Taqa) are expected to start the tendering process in the second half of 2024.

Al-Nouf project is the second public-private partnership (PPP) phase of Project Wave, which will replace the current aquifer water injection systems used to maintain reservoir pressure in all onshore oil fields in Abu Dhabi.

Like the first-phase Mirfa seawater treatment plant, the Al-Nouf facility will be developed and maintained as a build-own--operate-transfer (BOOT) project.

CONTACT:
Abu Dhabi National Oil Company (Adnoc)
PO Box: 898
Abu Dhabi, UAE

Fax: +971 2 6023389

Kuwait's MEW Al-Dibdibah, Shagaya Solar Power Projects – Phase III

CLIENT: Electricity, Water & Renewable Energy Ministry (MEWRE), Kuwait
STATUS: Qualifications invited

Kuwait's Electricity, Water & Renewable Energy Ministry (MEWRE), through the Kuwait Authority for Partnership Projects (KAPP), has invited interested companies to submit their statements of qualifications (SOQs) for a 1,100MW solar independent power producer (IPP) scheme in Jahra governorate.

Last date to submit the SoQs is 7 March, 2024.

The contract tender is for the development, financing, design, procurement, engineering, construction, testing, commissioning, operation, maintenance and transfer of the Al Dibdibah Power and Al Shagaya Renewable Energy – Phase III – Zone 1 Solar PV IPP, a renewable power plant with a net capacity of 1,100 MW.

The project will benefit from power purchase agreement (PPA) with MEWRE as the off taker for a 30-year term.

KAPP, and MEWRE are assisted by Ernst & Young as Lead & Financial Advisor, DLA Piper as Legal Advisor and DNV as Technical & Environmental Advisor.

SPPC's Rumah, Nairyah Independent Power Projects

CLIENT: Saudi Power Procurement Company (SPPC), Saudi Arabia
STATUS: RfQs to be issued

The Saudi Power Procurement Company (SPPC), the principal off-taker for power projects in Saudi Arabia, is expected to start the prequalification process shortly for four independent power plant (IPP) projects with a total capacity of 7,200 megawatts (MW).

The request for qualifications for the four projects is expected to be issued within this month.

The projects are distributed across two IPPs in the central region (Rumah1 & Rumah2) and two in the eastern region (Nairyah1 & Nairyah2), with a capacity of 1800 MW per plant.

The plants will use natural gas combined cycle technology and have a provision for a carbon capture unit.

SPPC will conduct a competitive process to select a developer or developer consortia to develop each of the projects on a build, own and operate (BOO) basis. The term of the Power Purchase Agreement (PPA) is expected to be up to 25 years following commercial operations date.

Iraq BOC's Southern Basra Seawater Desalination Plant

CLIENT: Basra Oil Company (BOC), Iraq

STATUS: Contract awarded

The Basra Oil Company (BOC) has awarded a contract to Shanghai Electric of China to build a sea water desalination plant in Iraq to tackle a potable water shortage in the area.

The desalination and hydro-electric facility complex will be constructed by Shanghai Electric Company in the Southern Basra city under an agreement with the Baghdad government.

The Chinese firm has been awarded one more contract to build a \$1 billion power plant in the central Diyala governorate.

Aramco/Sabic's Liquids-to-Chemicals (OTC) Project

CLIENT: Saudi Aramco, Saudi Arabia

STATUS: Contract awarded

A civil sub-contracting deal has been awarded to Emypro of A General Licensing Agreement to support Saudi Aramco's liquids-to-chemicals programme has been signed with Worley Comprimio.

Aramco's strategy aims to remove or streamline several conventional industrial processes by integrating refining processes to produce petrochemicals directly, while reducing direct CO2 emissions from the process through carbon capture.

Aramco's \$100bn liquids-to-chemicals programme aims to convert 4 mbpd of its oil production into high-value petrochemicals and chemical feedstocks by 2030.

Aramco/Sabic plan to establish 10-11 large mixed-feed crackers by 2030.

Nama PWP's Ibri III Solar IPP

CLIENT: Nama Power and Water Procurement (PWP), Oman-

STATUS: RfQs invited

The Nama Power and Water Procurement (PWP) of Oman has invited requests for qualification (RfQs) for the development of a New Solar PV Independent Power Project (IPP) at Ibri in the Sultanate of Oman.

The deadline for submitting the RfQs is 19 February, 2024.

This 500 MW facility is the fourth solar PV project being developed by Nama Power and Water Procurement in partnership with the private sector.

The launch of the Ibri III Solar IPP comes as part of Oman's vision to diversify fuel sources and achieve net zero target by 2050 through the use of clean energy for power generation.

Bahrain EWA's 15.5 MWac Solar PV Power Plant

CLIENT: Ministry of Electricity and Water Affairs (EWA), Bahrain

STATUS: Bids invited

Bahrain's Ministry of Electricity and Water Affairs (EWA), on behalf of the Ministry of Interiors (MOI), has invited proposals for developing and operating a combined solar plus Electric Vehicle (EV) charging project on MOI premises.

Last date to submit bids is 31 March, 2024.

The EWA tender invites bidders to participate in 'Request for Proposal (RFP)' to Build, Own, Operate and Maintain (BOOM) a minimum capacity of 15.5 MWac (Megawatt AC) grid-tied solar photovoltaic (PV) power plant on building rooftops and car parks with EV charging stations.

The duration of the BOOM contract is 20 years. It also underlined that the Fixed Tariff rate quoted by the bidder shall not exceed 21 fils per kWh.

Saudi Arabia Explores 1,200 Sites for Solar Projects

Energy Minister, Prince Abdulaziz Bin Salman has revealed that there are currently 1,200 sites across various regions of the Kingdom being studied to determine the most suitable locations for solar energy projects.

During a session titled 'The Role of Innovation and Digital Transformation in Enhancing Efficiency in the Energy Sector Towards a Sustainable Future' at the Digital Government Forum in Riyadh, the prince announced a new direction to provide sustainable energy to companies at a fixed and stable price for a long period, asserting that the Kingdom is capable of doing so to enhance the economic returns of facilities.

The prince added that the Ministry has succeeded in reducing costs by using modern technologies in the process of extracting, producing, and distributing all forms of energy, as well as in reducing costs in manufacturing spare parts and devices used in these processes.

He also noted that the Kingdom has 'thousands' of oil and gas pipelines spread across the country, highlighting the importance of artificial intelligence technology in monitoring various aspects around them, including maintenance, safety, and security. ■

KOTC Presents Plans for Design and Construction of Gas Tankers

The Kuwait Oil Tanker Company has formally presented plans for the design and construction of three gas tankers and a colossal crude oil tanker to prominent international shipyards and shipbuilding companies.

The designs for the three gas tankers were submitted to major entities such as Korean Hyundai Heavy Industries Limited, Chinese Shanghai Wagaoqiao Ship Company, Japanese Mitsubishi Heavy Industries Company, and Japanese Kawasaki Heavy Industries Company.

Regarding the massive crude oil tanker, proposals for its design, construction, and delivery were extended to Korean Hyundai Heavy Industry Co., Ltd., Chinese Shanghai Wagaoqiao Ship Company, and Bohai Heavy Industry and Shipbuilding Company.

These tanker projects mark the initiation of the fourth phase of the fleet modernization initiative, which encompasses the development of a substantial crude oil tanker and four petroleum product tankers, in addition to the construction of three liquefied gas tankers.

The decision to embark on the fourth phase was prompted by a downturn in construction activities at international shipyards.

Despite the challenges, the Kuwait Oil Tanker Company remains committed to sustaining a marine fleet of optimal size and quality, aligning with long-term strategic coverage and marketing requirements.

This commitment is further tailored to meet targeted production rates within Kuwait while strategically operating and leasing surplus tankers to address global market needs on commercial grounds. ■

OQ Invests Over \$2bn in Gas and Power Projects in Musandam

OQ, the state-backed energy investment company of Oman, has invested 800 million rials (\$2.08 billion) across three projects in the governorate of Musandam.

The projects include the Musandam Gas Processing Plant, the management of offshore fields in Concession Area 8 and the Musandam Power Plant.

According to OQ, its investments in the Musandam Gas Processing Plant is pivotal to the transformation of the region's energy infrastructure, while also supporting the needs of the governorate.

Additionally, OQ stated the operation of the offshore fields, owned by Oman's Ministry of Energy and Minerals, focuses on enhancing operational efficiency, increasing production, and reducing operational costs.

The area includes the Bukha and West Bukha fields, which supplies the Musandam Power Plant and provides electricity to the governorate with a production capacity of about 120 megawatts per hour.

OQ is also executing several social investment projects across the governorate, valued at RO 4 million, which will focus on urban, environmental and tourism aspects. Projects include developing the Daba Archaeological Centre, the Daba Waterfront Project, and the development of Telegraph Island, among others.■

Iran Oil Ministry begins Completing \$47.5bn-Worth Projects to Boost Output

Iranian Oil Minister Javad Oji said the ministry has started completing 50 projects in the oil industry with a total investment of \$47.5 billion to increase the country's oil and gas output.

Speaking in a meeting with Ahmadreza Dastgheyb, the head of the Supreme Audit Court of Iran, in mid-December, Oji presented a report on the two-year performance of the Oil Ministry in the 13th government and said the most important issue in the country's oil and gas industry is investment.

"A country that ranks first in the world in terms of total oil and gas reserves has a good capacity for investment," Oji said.

According to Oji, one of the positive measures taken by the Oil Ministry in the current government administration has been the increase in investment in the industry, which has been in line with the increase in production in the fields of oil, gas, as well as petroleum and petrochemical products.

Oji pointed to some of the key projects implemented by the ministry to increase production in various fields, saying: "Maintaining production, increasing oil and gas production, boosting joint fields' output, increasing gas storage, making new discoveries, increasing the country's oil and gas refining capacity, improving the quality of petroleum products, increasing the production of petrochemical products and increasing the capacity of gas refineries have been among our key projects."

"So far, we have implemented 132 projects, which were mainly semi-finished projects in the oil industry. In [the Iranian calendar

year] 1401 (ended on March 20), 48 projects were put into operation, and this year 67 projects have been put into operation or will be put into operation," the official said.

"Completion of 50 new projects has started in line with the increase in production, which are worth 47.5 billion dollars. The total investment made in the projects that have been completed or started so far is 76 billion dollars," he added.■

UAE Banks Federation to Mobilize \$272bn in Sustainable Funds by 2030

The UAE Banks Federation has announced a significant initiative from the country's financial sector to collectively mobilize over AED 1 trillion (\$272 billion) in sustainable funding by 2030.

The announcement was made at an event, organized by the Central Bank of the United Arab Emirates (CBUAE), in cooperation with the COP28 Presidency, to facilitate global climate finance solutions and progress towards a sustainable future.

Held on Finance Day at COP28, it is aligned with the CBUAE's strategy to lead sustainable finance efforts to enable climate action.

Bringing together global leaders of key international financial institutions to address global climate action and foster sustainable finance, the panel featured Kristalina Georgieva, Managing Director of the International Monetary Fund; Ravi Menon, Managing Director of the Monetary Authority of Singapore; and Mark Carney, UN Special Envoy for Climate Action and Finance.

These leaders underscored the crucial role of sustainable finance in global climate action and outlined steps to overcome challenges faced by different global regions.

During the keynote address, Khaled Mohamed Balama, Governor of the CBUAE, highlighted the key role of the

financial system in developing green and sustainable finance with a focus on ensuring financial sector progress, advancing innovative solutions, and safeguarding resilience.

In addition, Balama stressed the importance of technology in achieving sustainable development objectives given the potential of sustainable finance to leverage digitalization and innovation to enhance global transformation towards sustainability.

Abdul Aziz Al Ghurair, Chairman of the UAE Banks Federation, said the mobilization of sustainable finance targets by the UAE banking sector advances the forward-looking sustainable finance ambitions of the UAE and sets the foundations for enabling sustainable transformation and climate action.

The CBUAE also emphasized the role of digitalization and advanced technology innovations in driving global climate action and sustainable finance.

During the event, the CBUAE highlighted the solutions of the COP28 UAE TechSprint – a global initiative launched by the CBUAE in collaboration with the Bank for International Settlements, the COP28 Presidency, and the Emirates Institute of Finance, with the aim of advancing innovative technology solutions in sustainable finance to scale up climate action.

Dr Sultan bin Ahmed Al Jaber, Minister of Industry and Advanced Technology and COP28 President, said: "Active engagement from the financial sector is critical to realize our collective climate ambitions, ensuring that the crucial 1.5°C target remains within reach."

"Achieving net-zero emissions hinges on the strategic allocation of capital towards environmentally sustainable and climate-resilient investments. Today's landmark announcement by UAE banks is a strong demonstration of the UAE's commitment to lead by example and deliver actionable solutions to sustainability and the climate crisis," stated Al Jaber.■

Oman's Integrated Gas Company Appoints New CEO

Dr Aflah Al Hadhrami

The Board of Directors of Oman's Integrated Gas Company has appointed Dr Aflah Al Hadhrami as Chief Executive Officer.

Dr Al Hadhrami has an extensive track record of local, regional, and international experience in executive leadership within the oil and gas sector. With a professional career spanning over 28 years, he has held various executives, operational, technical, and commercial roles in multiple

companies.

Before joining Integrated Gas Company, established by the Ministry of Finance in December 2022, he served as the CEO of Alshawamikh Oil Services company. Prior to that, he held leadership positions at British Petroleum, Occidental Petroleum Corporation, Schlumberger Limited, and Oman Oil Refinery Company.

Dr Al Hadhrami also holds leadership and chairs various boards and several memberships in various councils and committees across different sectors.

In addition to his extensive managerial experience and strategic mindset, he has a PhD in Business Management from the University of Liverpool, United Kingdom, and is a professionally licensed member of the Royal Chartered Institute of (MCIPS / UK).

Alongside his work in the oil and gas industry, he has served as an academic lecturer at the College of Economics and Political Science at Sultan Qaboos University.

The Board of Directors said it will rely on Dr Al Hadhrami's broad experience and leadership skills to achieve the company's goals and aspirations in the upcoming period.

Integrated Gas Company is a wholly-owned company by the Ministry of Finance, responsible for managing all allocations, assets, rights, and obligations related to the purchase, sale, import, export, and transportation of natural gas and related products on behalf of the Omani government under the license agreement granted to them.

Amel Chadli Named as Schneider Electric Gulf Cluster Head

Schneider Electric, a leader in the digital transformation of energy management and automation, has appointed Amel Chadli as the company's Gulf Cluster President.

In her new role, Chadli will drive innovation and growth in digital transformation, sustainability, and energy management and industrial automation with artificial intelligence technologies across the Gulf region.

Formerly, she was the Vice President of Digital Energy and Energy Management Software - Middle East & Africa,

Amel Chadli

leading the company's smart building, healthcare, and microgrid initiatives, contributing towards energy-efficient customer transformations.

"Schneider Electric's success in the UAE and the Gulf region has always been driven by its commitment towards people development and will always be at the heart of our growth engine," stated Chadli.

"We will continue to invest in top local talents and attract emerging leaders, solidifying Schneider Electric position as the digital partner of choice for sustainability and efficiency," she added.

Chadli also stressed the importance of partnerships and synergies in the region with stakeholders including customers, partners, public sector, and academia.

An advocate for the UN Women Empowerment Principles in Africa, she sits on the Executive Committee of RES4Africa, a foundation with a resolute dedication to supporting Africa's energy transition and achieving Sustainable Development Goal 7 (SDG7).

Reflecting on her accomplishments over 19 years with the company, Chadli highlighted her role in Africa's energy evolution, ensuring equitable access to safe, reliable, sustainable power.

Following the appointment, Ahmed Khashan, former President of Gulf Countries at Schneider Electric, will take on the role of Senior Vice President Strategy and Business Development for International Operations at Schneider Electric covering the Middle East and Africa, India, South America & Pacific regions.

Esha Srivastava (IFS) Appointed as Joint Secretary in Indian Petroleum Ministry

Esha Srivastava

The Appointments Committee of the Cabinet (ACC) has approved the appointment of Esha Srivastava (IFS) as Joint Secretary in the Ministry of Petroleum & Natural Gas (MoPNG). According to an order issued from the Department of Personnel & Training (DoPT) on January 8, she has been appointed to the post for an overall tenure of five years or until further orders, whichever is earlier.

Srivastava is an Indian Foreign Service (IFS) officer of 2004 batch. She completed her post-graduation in Political Science (Honors) from Lady Shri Ram College of Delhi University. She is the recipient of the prestigious Dr Karan Singh Gold Medal for topping Delhi University at post-graduation level.

Bahrain

► Tender Name	Oil Analysis of Power Transformers Insulating Oil
Country	Bahrain
Bid Bond	BD 1000
Description	<p>The Tender Board of Bahrain has invited bids for the Oil Analysis of Power Transformers Insulating Oil.</p> <p>The project scope covers power transformers oil sampling, performing the required tests by proven transformer oil testing laboratory as per international standards, preparation of oil analysis reports with recommendations and submit the final report to Electricity Transmission Directorate as per technical requirements.</p> <p>The Client is the Electricity and Water Authority. Complete tender documents can be obtained on payment of BD 50 from the e-Tendering portal at http://www.tenderboard.gov.bh.</p>
